DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-30, drawn for use in connection with a network capable of providing communications between a plurality of customers generating service request and a plurality of vendors capable of fulfilling said service requests, a system for monitoring and controlling work flows associated with said service requests between said plurality of customers and said plurality of vendors, classified in class 705, subclass 400
 - II. Claims 31-55, drawn for use in connection with a network capable of providing communications between a plurality of customers generating service request and a plurality of vendors capable of fulfilling said service requests, a system for brokering said service requests between said plurality of customers and said plurality of vendors, classified in class 705, subclass 8.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as transferring at least one of said at least one message, data files, software applications, and documents to at least one of said first customer and said first vendor. See MPEP § 806.05(d).

Art Unit: 2163

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to William Munck on April 4, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
